

YC500I

Microinverter

- Single unit connects two solar modules
- Individual MPPT for each module

DIMENSIONS

Our flagship product, the APsystems YC500I is a grid-tied microinverter with intelligent networking and monitoring systems to ensure maximum efficiency. Highly dependable and cost effective, the YC500I delivers 225W to 250W AC per module with dual MPPT. Half the inverters and half the installation means real cost savings for residential and commercial customers.
